Computer Repair Website

Submitted To: Mr. Kamal Deep Gautam
Guided By: Himanshu Tank , Priyansh Saini & Surendra kumar
Tirupati College of Technical Education, Jaipur
Session: 2024–2025

- Static website for computer and laptop repair services
- Includes services for printers and CCTV setups
- Uses HTML, CSS, and Bootstrap

Introduction

- Create a responsive and informative website
- Showcase available services clearly
- Easy navigation and contact information

Objectives

- HTML5
- CSS3
- Bootstrap 5
- JavaScript (minimal)
- Font Awesome

Technologies Used

- Prototype Model
- Pages created and tested iteratively based on feedback

Development Model

- index.html – Homepage with service overview and carousel
- about.html – About the company
- laptop_repair.html – Detailed laptop repair services
- Cctv repair.html- detailed cctv repair services

Project Pages

- Responsive Navbar
- Image Carousel
- Contact Form (static)
- Grid-based layout
- Visual and textual content

Key Features

- No backend or database support
- No user login or authentication
- Static contact form only

Limitations

- Enable dynamic form submission
- User login and booking system
- Admin panel for updates

Future Scope

- Screenshot: Home Page
- Screenshot: About Us Page
- Screenshot: Laptop Repair Page
- Screenshot: Cctv Repair page

Website Screenshots

- HTML structure for layout and content
- Bootstrap classes for responsiveness
- Minimal JavaScript for interactivity

Source Code Overview

- Demonstrates frontend development using HTML, CSS, Bootstrap
- Useful for local businesses
- Expandable to full dynamic website in future

Conclusion

THANK YOU
